(a) The number of Births and Deaths given for 1853 are all of which there is any record; but they are known to be considerably under the mark. It is supposed that each in reality amounted to not less than 5,000. The deficiency has arisen owing to the system of registering Births and Deaths having been entirely changed during the year 1853, and to the new system not being at first properly understood. In consequence of this, and also owing to the unsettled state of the gold-field population, it is known that many children born were neither baptized nor registered, and many persons who died were buried without registration or funeral service.

(b) The returns of Gold Exports for the four years, 1852–1855, contain, in addition to the amounts which passed through the Customs of this colony, the following quantities of Victorian gold, which passed through the Customs of the adjacent colonies without being recorded in Victoria:—1852, 749,957 ozs., value £2,624,851; 1853, 652,297 ozs., value £2,446,114; 1854, 247,366 ozs., value £958,543; 1855, 41,530 ozs., value £166,120. Total, 1,691,150 ozs., value £6,195,628. No estimate has been given of the further quantity of gold taken out of the colony by private hand and not recorded in any Custom House.

(c) The figures of Revenue and Expenditure given for 1866 are only the receipts and disbursements *during* 1866 on account of that year. The whole returns of Revenue and Expenditure, *for the service of* 1866, will also include the receipts and payments on account of that year, down to the end of 1867.

(*a*) These figures are copied from last year's return, no estimate of the population or number of dwellings having been received for 1866.——(*b*) These figures are copied from last year's returns, no estimate of the total value of rateable property having been given for 1866.——(*c*) This return is for the year ending 31st December, 1866, in place of the shire and road district financial year.——(*d*) This return is from 15th May to 16th October, 1866.

NOTE.—In several instances the above returns are incomplete, especially as regards the estimated population, number of dwellings, and total value of rateable property. The totals of these columns do not therefore represent the sum of these items in all the Shires and Road Districts. Wherever an asterisk (*) occurs, the information has not been furnished. The balances for and against the several Shires and Road Districts are respectively represented by the plus sign (+) and the minus sign (—). All places not marked as Shires are Road Districts.

(a) This column presents a statement of the amount realized for lands sold, but the value of the few acres granted in each year without purchase is not included.

(b) These figures have been furnished by the Assistant Commissioner of Crown Lands and Survey, who states that they have not been finally checked, but that he believes them to be accurate, or very nearly so.

Note.—This table only includes the alienated land under the Act, but not that held under lease from the Crown.

* In the last six months of 1853 the registered deaths exceeded the registered births by 138, as is shown by the minus sign (—) prefixed to that number. There is no doubt, however, that the actual births were largely in excess of the registered births, and in excess of the actual deaths, as in other years. The present system of registration was introduced in the middle of 1853, and being for some time not properly understood, many births and deaths which occurred were not registered. It is probable that in consequence of the difficulty of procuring burial without the death being registered, deaths did not so often escape registration as births, and hence the greater deficiency of the latter.

NOTE.—This table has been compiled from returns received from the Police Magistrates, Town Clerks, Presidents and Chairmen of Shire Councils and Road Boards, and other officials located in the various districts, in accordance with forms supplied them from the Immigration Office. These forms, in addition to columns for the above information, contained a request that the wages of any other prominent callings might be furnished. This request resulted in wages of miners being returned at 7s. 6d. per day without rations for Majorca, at from £3 to £3 5s. per week without rations for Wood's Point, and at £1 per week with rations for Korong; in wages of quartz miners being returned at 12s. 6d. per day without rations for Crooked River, and at £2 5s. per week without rations for Daylesford; at wages of building laborers being returned at from 7s. 6d. to 8s. per day without rations for Ballarat, and at wages of boundary riders being returned at £60 per annum with rations for Horsham. Some of the rates of wages given appear to be too high, as, for instance, those of farm laborers, shepherds, &c., at Belvoir. These are probably not the average, but the extreme rates paid at harvest or shearing time, and quoted as the highest during the year.

WILLIAM HENRY ARCHER, Registrar-General.

(*a*) The returns of the Roman Catholic and Presbyterian Churches were furnished in an incomplete state. It has therefore been found necessary to supplement them with a portion of the returns of the previous year—the result being, of course, only an approximation to the truth.

(*b*) This column presents a statement of the average numbers attending at one service only on the Sunday, and it has been pointed out that this mode of calculating the attendance does not render the returns of the different denominations strictly comparable, inasmuch as, in connection with some religious bodies, there are several services held on the same Sunday, at each of which an entirely distinct set of worshippers attends, whilst, in the case of other denominations, the attendance at subsequent services always consists, to a greater or less extent, of the same individuals as were comprised in the first congregation.

WILLIAM HENRY ARCHER, Registrar-General.

Note.—As regards some of the denominations, the year 1859 shows an apparent falling off in the number of buildings used for public worship, and in the amount of accommodation provided. This is in consequence of those denominations having for that year given returns only of the regular churches and chapels, and not of the other buildings in which services were held.

Many of the figures are known to be very much under the truth, and both Tables must only be considered as approximations to accuracy. The figures for Talbot are those for 1865.

QUARTZ REEFS AND EXTENT OF GOLD WORKINGS.

Return of the Number of distinct Quartz Reefs actually proved to be auriferous, and the Total Extent, in Square Miles, of Auriferous Alluvial and Quartz Ground actually worked upon in the several Mining Districts.

Mining Districts.	Number of distinct Quartz Reefs proved to be auriferous.	Extent in Square Miles of Auriferous Alluvial and Quartz Ground worked upon.
Ballarat District	138	$69\frac{3}{4}$
Beechworth District	776	261
Sandhurst District	402	$212\frac{1}{2}$

Castlemaine District	361	$184\frac{3}{4}$
Ararat District	44	$63\frac{7}{8}$
Total	2,282	$869\frac{17}{40}$

Note.—The number of "distinct" quartz reefs cannot be strictly correct, as parts of the same reef, in some localities, are held to be distinct reefs, and named accordingly. As the reefs are further explored, it is found, too, that what were supposed to be separate reefs are not really distinct.

Total	$861,468\frac{13}{20}$	459,895	7	0	10	16·2

Note.—*The above table does not show the total quantity of quartz crushed in the several localities, but only the yield of certain "crushings" respecting which the Mining Surveyors and Registrars have been able to obtain information.* Owing to the circumstance that many of the machine owners are unable to give, or are precluded from giving information, it is impossible to get complete returns from every district, and in considering the relative importance of each district, as regards quartz mining, the tables relating to machinery should be examined and compared.

Since the first publication of the Statistics, information has been obtained concerning $3,976,589\frac{19}{20}$ tons which have been crushed, which yielded an average of 11 dwts. 22·80 grs. per ton.

PRODUCE OF GOLD FROM QUARTZ VEINS AND ALLUVIAL WORKINGS.

Return showing approximately the Gold obtained from Quartz Veins and Alluvial Workings during the Year 1866.

	Ozs.
From Quartz Veins	521,017
From Alluvial Workings	958,177¾
Total Gold Exported	1,479,194¾

Note.—The above results are only rough approximations. The Mining Surveyors and Registrars have given approximate returns of the gold obtained severally from quartz veins and alluviums in their divisions; but as the surveyors and registrars could at best furnish no more than estimates, derived from the returns made by the banks and gold buyers, and from their own knowledge of the nature of the workings in their districts, the figures must not be considered as correct. Only one estimate—that for the Sandhurst Division—has been altered. It was evidently inaccurate, and judging from the data given by the registrar, unreliable.
